SUMMARY

Software Engineer with experience building and deploying full-stack applications using .NET, JavaScript frameworks, and relational databases. Proven track record of improving operational efficiency through automation, modernizing legacy systems, and delivering scalable API-driven solutions. Strong background in system design, CI/CD pipelines, and cross-team collaboration in enterprise environments.

WORK EXPERIENCE

Software Engineer

Publix Super Markets,

- Design and develop full-stack features using .NET and modern JavaScript frameworks to support internal business applications.
- Implemented API integrations and data-driven solutions to automate workflows, streamline operations, and reduce manual effort for multiple departments.
- Enhanced application security and infrastructure by contributing to annual security plan updates, UAC/SSIS/database improvements, and CyberArk integration, ensuring compliance and reliability.
- Contributed to API design, integrations, and deployment workflows in enterprise environments

Associate Software Engineer

Publix Super Markets,

- Built internal automation tools, including a release packaging solution that reduced processing time from over 60 minutes to under 5 minutes.
- Designed and implemented front-end and back-end features across multiple internal applications, improving usability and operational efficiency.
- Collaborated with cross-functional teams to migrate legacy systems to modern platforms, ensuring smoother adoption and long-term supportability.

Associate Quality Assurance Engineer

Publix Super Markets,

- Develop, maintain, and execute manual and automated test scripts (including BDD-based cases) to validate functionality across multiple projects.
 - Identify, document, and escalate defects using test management tools, ensuring accurate reproduction and resolution of issues.
 - Contribute to test planning, strategy, and reporting by reviewing requirements, estimating effort, and delivering clear test metrics and summaries.
 - Transitioned into a development role after demonstrating strong understanding of systems and workflows.
-

PROJECTS

Multi-Business Booking Platform (BerryEze)

- Designed and built a full-stack booking platform using .NET Core, Angular, and PostgreSQL
 - Implemented business-based authentication using OAuth (Google), enabling secure onboarding without customer accounts
 - Built scheduling system with business hours, service selection, and conflict prevention logic
 - Integrated messaging system using Twilio (SMS/RCS) for appointment confirmations and notifications
 - Developed calendar integration (ICS + Google Calendar) for seamless user experience
 - Deployed application on Linux VPS with Nginx reverse proxy and CI/CD pipelines via Azure DevOps
-

EDUCATION

Bachelor's degree in Accounting

Associate's degree in Web Development

TECHNICAL SKILLS

Languages: C#, JavaScript, SQL

Frameworks: .NET Core, Angular, Vue.js

Databases: PostgreSQL, SQL Server

Tools & Platforms: Azure DevOps, Git, Linux (Ubuntu), Nginx

Concepts: REST APIs, System Design, CI/CD, OAuth Authentication, Automation, Microservices
